

Add Medicine and Add/Update Image

This guide explains how to add a new medicine from the Admin screen and attach or update its image.

Audience: End users (non-developers)

Before you start

- Keep the medicine image ready on your device.
 - Use a unique medicine ID. This ID is also used as the brand name in the current form.
 - Supported image formats: .png, .jpg, .jpeg, .svg.
-

1) Open Admin from Settings

1. Open the app and go to the catalog.
2. Click Settings (gear icon) to open the Admin screen.

3) Add or update medicine image

1. Click Import Image in the same dialog.

The screenshot shows a light blue dialog box with three main sections. The top section is a text input field labeled 'Unique ID (for image and brand)*' containing the text 'ALSIFEN-120'. The middle section is a button labeled 'Import Image' with a blue document icon, which is highlighted by a red rectangular border. The bottom section is a dropdown menu labeled 'Source*' with the text 'Avis Lifecare Pvt Ltd' and a downward arrow. At the very bottom of the dialog is a large, dark blue button labeled 'Save Changes'.
